

## Department of Natural Resources Designation of Infested Waters

April 29, 2013

Pursuant to the provisions of *Minnesota Statutes*, including but not limited to section 84D.03, subdivision 1 the following described waters are designated infested waters. New infested waters were designated by a Commissioner's Order INF-13-002 that was signed on April 22, 2013 and became effective on April 29, 2013. The additions, and modifications of previous designations, are underlined and deleted text is shown with strikethrough.

A lake in more than one county is listed under the county corresponding to its public waters inventory number, but the designation applies to the entire lake. Lake Superior and designated portions of rivers that flow through more than one county are listed under the heading Multiple Counties. Ponds and wetlands that are not on the public waters inventory are listed with "none" in the number column. Rivers and streams on the public waters inventory are listed without a number in the number column.
